

AMENDMENTS TO THE CLAIMS

Please amend the claims as indicated in the below listing of claims that will replace all prior versions and listings of claims in the application.

1. (Currently Amended) A method for providing at least one search result responsive to a search query comprising at least one search query term, the method comprising:

parsing a set of pages for a plurality of text and non-text indexable elements;

storing the plurality of text and non-text indexable elements in a computer readable medium as a plurality of records;

receiving the search query to request a stored record, the search query received from a user across a networked connection;

searching said plurality of records to determine text and non-text indexable elements that correspond to the search query;

transmitting at least one text element representation of said query result to a the user across the networked connection; and

transmitting at least one non-text element representation of said query result to said user across the networked connection.

2. (Previously Presented) The method of claim 1, wherein the non-text elements comprises an image.

3. (Previously Presented) The method of claim 1, wherein the record comprises a Webpage.

4. (Cancelled)

5. (Cancelled)

6. (Previously Presented) The method of claim 1, wherein the non-text indexable element comprises a sound file.

7. (Currently Amended) A method for indexing records in an index of the world wide web, the method comprising:

receiving a record from the world wide web;

parsing the record for associated text and a non-text indexable elements;
creating representations of the parsed text and non-text indexable
elements; and

storing the representations in association with the record as a one or more
word location pairs.

8. (Previously Presented) The method of claim 7, wherein the non-text
indexable element comprises an image.

9. (Previously Presented) The method of claim 7, wherein the record
comprises a Web page.

10. (Cancelled)

11. (Cancelled)

12. (Previously Presented) A system for providing at least one search
result responsive to a search query comprising at least one search query term, the system
comprising:

a parse module for parsing the at least one record for text and non-text
indexable elements;

an indexing module for indexing the text and non-text indexable elements;

a query module for receiving the search query, the search query requesting
at least one text and non-text indexable element in the world wide web, the search query
received from a user across a networked connection;

a search module for locating corresponding text and non-text indexable
element relating to the search query; and

a transmitter for transmitting a representation of the non-text indexable
element and a text representation corresponding to the search query result to a the user
across the networked connection.

13. (Previously Presented) The system of claim 12, wherein the object
comprises an image.

14. (Previously Presented) The system of claim 12, wherein the record
comprises a Web page.

15. (Cancelled)

16. (Cancelled)

17. (Previously Presented) The system of claim 12, wherein the object comprises a hyperlink to a sound file.

18. (Previously Presented) A system for indexing records in an index of an information network, comprising:

a parser for parsing a record for text and non-text indexable elements;

a database for storing said text and non-text indexable elements;

an query module for searching the database for a link to said non-text indexable elements appearing in the record;

a subsystem for creating a representation of the text and non-text indexable elements;

a subsystem for storing the representation in association with the record;
and

a subsystem for making an entry for the record in the index including the representation.

19. (Previously Presented) The system of claim 18, wherein the object comprises an image.

20. (Previously Presented) The system of claim 18, wherein the record comprises a Web page.

21. (Cancelled)

22. (Cancelled)
